SCHOLARSPHERE

ScholarSphere is an easy-to-use repository service that lets you collect, preserve, and share your research and scholarly work with the Penn State community and the world.

Why should I use ScholarSphere?

To meet funding agency requirements for sharing research data
Comply with federal regulations for creating a data management plan—now a requirement for submitting grant proposals to agencies such as the National Science Foundation. Learn more at **libraries.psu.edu/psul/pubcur/datamanagement.html.**

To manage who can view your work
Provide open access to your work or keep it private—with ScholarSphere's adjustable privacy settings it's up to you.

To ensure secure storage of your content
Preserve data in any media format—whether it's a data set, paper, image collection, or more—from any academic discipline.

Who is using ScholarSphere?

Dr. Christopher P. Long
associate dean for graduate and undergraduate education and professor of philosophy and classics

Lori Hepner, M.F.A.
associate professor of integrative arts

Dr. Andrew R. Deans
associate professor of entomology and director of the Frost Entomological Museum

A service of the University Libraries and Penn State IT.
